

VISION

“Power to the Edge!”

People throughout the trusted, dependable and ubiquitous network are empowered by their ability to access information and recognized for the inputs they provide

MISSION

- **Lead the Information Age transformation of the Department of Defense by building the foundation for network-centric operations through policies, program oversight, resource allocation, and the provision of value-added support**

Goal 1: Make information available on a network that

- **Achieve a ubiquitous,
secure and robust network**
- **Eliminate bandwidth,
frequency and computing
capability limitations**
- **Deploy collaborative
capabilities and other
performance support tools**
- **Secure and assure the
network and the
information**

Goal 2: Populate the network with new, dynamic sources of

- **Populate the network with all data (intelligence, non-intelligence, raw, and processed)**
- **Continuously refresh the content of the network**
- **Consider that all users of information also are suppliers - post before you process**
- **Improve sensemaking**
- **Develop new ways to gain access to adversary information**
- **Continuously surprise the enemy with the information we are using**

Goal 3: Deny the enemy advantages and exploit

- **Effectively conduct offensive Information Operations**
- **Implement full spectrum security**
- **Conduct aggressive counterintelligence**
- **Collect persistent, responsive, exquisite intelligence**
